Georgia Institute of Technology
2010 - 2015

SUMMARY OF QUALIFICATIONS

5 years of relevant work experience in Front-end Web Development. Led and developed multiple websites for companies, products, and campaigns in the advertisement space. Occassionally dipping my hands in UI/UX design. I am an eager learner ready to jump into a fast-pace environment with great team spirit, organization, time management, and communication.

PROFRESSIONAL EXPERIENCE

FRONT END WEB DEVELOPER - WEB & PRODUCT DESIGNER

Hylink Digital Advertisement Agency / July 2018 – Present

- TECH STACK: HTML, CSS (Sass), JavaScript, jQuery, MySQL, Node.js.
- Implemented, designed, and maintained an internal web application consisting of multiple tools to help departments improve efficiency and productivity. Developed within a team and planned out database schemas for each tool in this application
- Individually responsible for structuring, developing, and designing several automation tools to convert complex form elements into a google document using the Google Drive API
- Self developed multiple internal branding websites for Hylink and integrated each site into Craft CMS for reusable website layouts used by other branches of the company in different countries.
- Led in the development of numerous websites for clients focusing on branding, products, events, and more. Sometimes in different languages such as Korean or Chinese.
- Collaborated with designers to conceptualize multiple mobile interactive advertisement web pages and also led the development process for each project. Usually these web pages are heavily animated using CSS animations and transitions.
- In charge of the UI/UX and front end development of a stock trading AI application. Worked with team members who understood stocks to come up with the most effective user flow.
- In progress of building a reusable CSS framework to be used across various projects at Hylink

FRONT END WEB DEVELOPER - WEB & GRAPHIC DESIGNER

SureCo Insurance Agency / June 2016 – July 2018

- Designed & developed (front-end) two main company websites along with multiple landing pages
  Constructed wireframes for each website and planned out color scheme and font pairing
  Designed icons and graphics of websites using Adobe Illustrator & Photoshop
  Implemented onto the web using ASP.NET, HTML5, CSS3, JavaScript, jQuery
  Created dynamic web forms using Ajax and above technologies
- Project Coordinator for company outsourcing jobs
  Plan meetings and propose project timelines for multiple design assignments
  Communicates project details and revisions with freelancers on concepts and designs

FRONT END DEVELOPER INTERN

Macy's Systems & Technology / May 2015 – December 2015

- Developed and designed an automation system for analytics monitoring
  Implemented dynamic and responsive form fields using PHP, HTML5, CSS3, JavaScript, and Ajax
  Created Database tables and familiarized with SQL statements to populate form fields.
  Utilized Git, MVC framework, and Bootstrap libraries

FRONT END WEB APPLICATION (CMS) DEVELOPER CO-OP

Hannon Hill Corp / May 2011 – August 2013

- Organized & tested code with JUnits to ensure quality assurance and fast performance
- Created responsive form fields using Java, JSON, jQuery, JavaScript, XML, CSS
- Developing process consists of agile scrum mythologies using JIRA and Git
